Member of the Sustainability Center Freiburg (since 2015); Project "SusLight" [with Fraunhofer IAF] (2015-2019)

SHORT BIO

Prof. Dr. Bernhard Neumärker concerns himself since many years with problems of social justice, economics of social conflict and political economy of reforms from a constitutional perspective. He applies his approaches of "New Ordoliberalism" (more recently, he calls it also "Progressive Ordoliberalism") and "Social Sustainability" to the Universal Basic Income (UBI) from an interdisciplinary viewpoint integrating mainly new aspects of liberty and justice and testing UBI in the Social Contract Laboratory (SoCoLab). He is, furthermore, founder of the Basic Income Research Group (BIRG) at the University of Freiburg. Since June 2019 he is "Götz Werner Professor of Economic Policy and Constitutional Economic Theory" at that university. and since September 2019 he is Head of the new "Freiburg Institute for Basic Income Studies (FRIBIS)". He is currently working on a reform mechanism of universal basic income for crises which he calls „Net Basic Income“, and which could be developed in postcrisis era towards a full UBI.
